

SureStrike™

Laser Cartridge

HOME DEFENSE * POLICE * MILITARY

Your personal training system - Train anytime, anywhere!

SureStrike™ will emit a split second laser beam simulating bullet impact point.
Training with SureStrike™ will allow you to:

- Save money – cost effective practice
- Practice drawing your weapon from a holster
- Improve your marksmanship skills
- Practice trigger operation and target acquisition
- Practice in the convenience of your own home - **Great for home defense practice !**
- SureStrike™ provides 100% safe training and does not allow a live round to be loaded

Train anytime, anywhere !

The immediate feedback transforms your dry fire practice into a powerful training tool. It is a convenient and economical way to maintain and improve shooting skills.

Practice makes perfect...Surestrike!

How does SureStrike™ work?

- The laser cartridge is placed into the chamber and secured in place.
- By pulling the trigger the impact of the firing pin activates the SureStrike™ to emit a microprocessor controlled eye safe laser pulse, a shot of red light, which simulates the point of impact where a bullet fired from the weapon would have struck.
- This immediate feedback received by the SureStrike™ transforms dry fire into a powerful learning experience.

The cutting edge technology and the highest craftsmanship makes the SureStrike™ the best Dry fire training for all level of users on the market today!
